

HOW TO ADMINISTER INFANT NASAL SPRAYS

Patient's head should be tilted back for all nasal sprays

Infant Patients

→ Saline Nasal Mist or Saline Drops (3 times daily)

Place saline mist nozzle in each nostril and press, counting to 3 before releasing nozzle or use 2-3 drops in each nostril,

Especially for night saline treatment, nose should be suctioned using a bulb syringe or Frida after saline and then replaced with more saline

→ Nasonex (once per day)

In the morning, following Saline Mist treatment, administer 1 Nasonex spray in each nostril
