

In order to limit exposure of our patients and staff to COVID-19 (CoronaVirus)

Please call our office 201-996-9200 and from your car and await instructions before entering the office/building.

Only the patient alone or one caretaker/parent with children or patients requiring essential caretaker may enter the office/building.

Our doctors will not see patients who have tested positive for COVID19, have been in contact with someone with COVID-19, are awaiting COVID-19 test results or who or who are exhibiting shortness of breath, sore throat, fever, loss of taste or smell, GI issues, cough, or flu-like symptoms.

At this time, we are not seeing patients with asthma, underlying respiratory illnesses or who are immune-compromised.

You will need to have your temperature taken and complete/sign a screening form indicating that you and your caretaker conforms to this policy.

Please dispose of all masks and gloves properly after leaving.

Thank you.
